

DESCRIPTION of the 'Say Hello to the World' and 'Say Hello to Your Country' projects

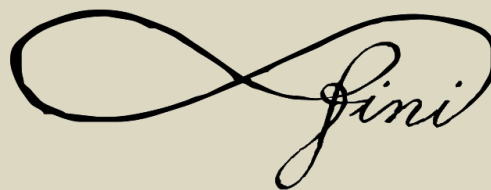

The Project connects children around the world, where throughout the game and under the supervision of educators, by a previously prepared program 'Five Fingers', they learn about different cultures and traditions, discover their home environment and the wider world, form the national and civic awareness, develop creativity, learn about the safe use of a computer and learn foreign words. In this way the children discover *the multicultural and other differences* from an early age on and get accustomed to the *acceptance of diversity*, which helps them to *overcome the prejudices and stereotypes* and thereby *reduces intolerance*. The project is based on a Curriculum for kindergartens.

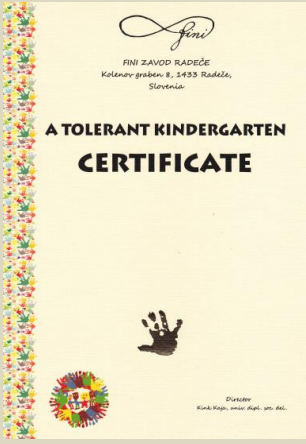

All communication takes place via a video call, which is enabled by the 'My Hello' Application.

COUNSELING	We are offering full support and consulting with our project. Our aim is to have active participation with mentors and be available when needed for guidance.	
'MY HELLO' WEB APPLICATION	Our proprietary application is a smooth and safe interconnection for participating educational institutions. The Application has <i>many functional advantages</i> , since it allows: <ul style="list-style-type: none"> - Uploading images and documents - Posting messages - Creating Glossary - Planning a video call - Submission of electronic evaluation forms - Integrated video conference

---	--	---

By joining the project the kindergartens/schools are obligated to participate in designing and building 'A Tolerant Kindergarten' / 'A Tolerant School' as a way of living.

Our participating schools strive to raise multicultural awareness, acceptance of all traditions and influence a wider population, in order to help to foster and maintain a more tolerant environment.

The title 'A Tolerant Kindergarten' / 'A Tolerant School' reflects acceptance as we must show the children that while we are not the same, we are nevertheless equal.
